

About Us

Here at Farm & Country Supplies we have been supplying animal feeds for over 20 years. Whether it is beef food, sheep food or llama mix we have it all in stock. We are always more than happy to offer advice. We supply animal food in bags or in bulk and are happy to arrange a yard visit by our nutritional advisor. We offer a fast delivery service on all our products.

Why Farm & Country

Family owned and run since 1992.

We have a friendly atmosphere and offer a personal service.

We like to show how much we care for our customers by ensuring that no one ever leaves our store unhappy.

We hold large stocks of all our products so that we have what you need when you need it.

We offer a fast and efficient delivery service.

Quality range of mineral and feed supplements for cattle and sheep

Sheep GP

A high specification mineral-vitamin lick for all sheep on grazing or high forage systems. Supports performance, health and fertility.

Fortified with minerals, trace elements and vitamins to supplement forages.

Contains added selenium, zinc, cobalt and iodine to support good stock health as well as supplementing grazing and forages with major minerals.

Ideal for all classes of ewes and lambs to support performance at grass or on high forage systems.
Ewes at tupping time and pre and post lambing.

High Magnesium

A high specification mineral-vitamin lick for grazing cattle and sheep at risk from staggers. Supports performance, health and fertility.

Contains a high level of magnesium to aid in the prevention of staggers (hypomagnesaemia).

Delivers a high level of available magnesium to stock in a palatable matrix. Contains added selenium, zinc, cobalt and iodine to support good stock health as well as supplementing grazing and forages with major minerals.

Ideal for breeding and lactating cows and ewes at risk from grass staggers.

High Energy

A high energy feed and mineral lick for cattle and sheep on grazing and low energy and protein forages. Supports performance, health and fertility.

Energy dense, including an extra high level of rumen by-pass energy, to increase energy availability to stock. Fortified with minerals, trace elements and vitamins to supplement forages. Contains hi-pro soya as a source of good quality protein.

Ideal for ewes at tupping time and pre and post-lambing. Cattle at bulling time, and pre and post-calving. Lambs to help support performance at grass or on high forage systems.

Cattle GP

A high specification mineral-vitamin lick for all cattle on grazing or high forage systems. Supports performance, health and fertility.

Fortified with minerals, trace elements and vitamins to supplement forages.

Contains added copper, selenium, zinc, cobalt and iodine to support good stock health as well as supplementing grazing and forages with major minerals.

Ideal for all classes of cattle to support performance at grass or on high forage systems.

Do not feed to sheep.

Dry Cow

A high specification mineral lick designed to reduce calving problems and assist breed back.

Will help where there is a milk fever risk and ease calving process.

High levels of selenium including the selenium yeast to help reduce the potential for retained cleansing and infections.

High Protein

A high energy feed and mineral lick for cattle and sheep on grazing and low energy and protein forages.

High protein feed lick, containing urea, for feeding with poorer quality roughages. Fortified with minerals, trace elements and vitamins to supplement forages.

The mixture of protein sources, including urea, increases protein availability to stock. Particularly suitable for growing cattle and pre-lambing ewes where extra protein is needed in the diet.

Ideal for cattle from mid-summer to support performance at grass. Ewes pre-tupping and lambing.
